it starts with iTero™

# Expand restorative treatments with the iTero Element™ intraoral scanner digital workflow.

## Work more efficiently with your lab.

The MyiTero portal provides access to cases and records anytime, anywhere.

### Step 1

Scan your patient

### Step 2

Diagnose and educate

### Step 3

Send scans to partners

### Step 4

Receive feedback

### Step 5

Begin treatment and  
monitor progress

## Enhance your diagnosis and treatment planning capabilities with the iTero™ Foundation software package.

- ⊕ Powerful tools such as the iTero™ TimeLapse technology and Occlusogram make your patients' oral health and treatment progress easy to visualize
- ⊕ Open platform allows seamless digitalization of your routine and interoperability of other digital workflows (chairside implant planning, CSM, etc.)
- ⊕ Benefit from fast<sup>4</sup> scans, reliable accuracy,<sup>5</sup> and enhanced lab connectivity
- ⊕ Easy to learn and use scanning protocol for greater efficiency
- ⊕ Get answers to any questions with direct access to a team of training and support experts

### Implant connectivity workflow

Scan the scan body of your choice and send the iTero™ scan automatically to your laboratory.

### Occlusogram

Highlight contact relationship between arches with clear, color-coded images.

### iTero TimeLapse technology

Show patients' gradual changes in tooth wear, tooth movement and gingiva over time using engaging chairside visuals.

1. Certified Pre-Owned (CPO) scanners are original equipment manufacturer certified refurbished units and are not available for sale in Canada or U.S. territories. They may not be offered in all regions and are subject to availability. CPO units have Restorative Foundation software and do not include Invisalign® workflow connectivity.
2. Following initial one-year service plan, additional charges will apply for remote support connection and repairs for customers not on a service plan. Additional charges may apply for software upgrades and cloud storage for customers not on a service plan. There is no commitment to move to a service plan after 1 year, but customers have an option to purchase a service plan after initial term.
3. Data on file at Align Technology, as of June 30, 2021.
4. Patient scans can be completed in as little as 60 seconds with the same accuracy and reliability that you have come to expect from iTero Element scanners. Actual scan times depend on individual experience.
5. Accuracy defined as a combination of trueness and precision tested on different substrates, under different lighting conditions, for crown preparation and full-arch scanning. Based on the results of 12 peer-reviewed papers 2018-2020. Data on file at Align Technology, as of November 20, 2020.
