Dentist-Anesthesiologist

# Anxiety and Pain Control in Dentistry

3 CE Credits

When: November 29, 2023      Hours: 6pm to 9pm  
Where: Care 1st Dental Institute  
1548 Valwood Parkway Ste 100  
Carrollton, TX 75006  
Direct: 214-566-7795      Tuition: \$500.00

## Course Description

This course will provide general dentists and specialists with the conceptual foundation and practical knowledge to minimize and eliminate the incidences of unpleasant experiences for their patients.

Attendees will learn about pain and anxiety control from various physiologic, psychologic, and cultural perspectives. After this lecture, attendees will be able to gain confidence in providing a relaxing and pleasant experience for your patients.

## Course Objectives

- Learn the cultural, psychological, and physiological impact on patient's perception of pain
- Mitigate the incidences of pain using a multi-modal approach to pain control
- Review the mechanism behind local pain control
- Troubleshoot difficult local anesthesia
- Discuss advanced local anesthetic blocks
- Identify methods of post-operative pain control, including targeting local, peripheral, and central nervous system
- Understand the role of opioids in pain control and the current opioid epidemic
- Use of sedation as a method of anxiety and pain control
